

EN • Hair and Scalp Consult (400x lens, 400x CAP, Software package)

Device for aesthetic use. Does not perform diagnosis and treatments.

Cod. 600356

Manufacturer

Callegari S.r.l.

Description and intended use

The Hair and Scalp Consult (400x lens, 400x CAP, Software package) is an optional package available with Soft FX and consists of three components: 400x Lens, x400 cap and Software Package.

The lens and the cap have to be used as accessories in combination with the CAM FX for the execution of the rapid tests and programs provided by the Soft FX device.

Soft FX is a device used to establish and assess the main skin parameters, for aesthetic, non-diagnostic purposes. The device is intended to be used in chemist's shops, OTC retailers, beauty salons, spas, wellness centres, aesthetic medicine centres and other locations where skin analyses are performed for purely aesthetic reasons. The instrument does not require specialised personnel.

Soft FX skin analysis system is a modular device which consists of the following components: machine body, Melanin – Hydration probe (MEL-HYD FX), Elasticity probe (ELA FX), microcamera (CAM FX - skin). Consumables for the sebum analysis (TAPE FX) are required.
